

Ecology Activity Challenge Colouring Page

KS4 / GCSE / Year 10 - Biology

Identify the missing or incomplete component in this ecology study plate, then colour-code the system.

Ecology Activity Challenge Colouring Page

KS4 / GCSE / Year 10 - Biology

Identify the missing or incomplete component in this ecology study plate, then colour-code the system.

Parent & Teacher Guidance

Curriculum focus

Topic: Ecology. Develop accurate observation, subject vocabulary and evidence-based explanation. Mapped scope: DfE GCSE subject content and key stage 4 curriculum entitlement.

Before you begin

Review the picture together and ask the learner what they already notice about Ecology. Read the activity aloud, explain unfamiliar vocabulary, and agree which details need special attention.

Solo activity

The learner can complete the colouring independently, then use the finished page to explain three details linked to Ecology. Encourage accurate colour choices where they carry meaning, but allow creative choices elsewhere.

Group activity

Give pairs or small groups different areas to inspect. Ask them to agree on evidence before colouring, compare their findings, and present one curriculum fact to the class. Finish with a whole-group check against the guidance below.

Questions to guide discussion

What evidence can you see? Which feature is most important and why? How does one part connect to another? What new fact about Ecology can you explain using the picture?

Answers and checking

Add the feeding arrow from the small fish to the heron. Food-web arrows show the direction of biomass and energy transfer, from the organism eaten to the consumer.

Learning record and next steps

☐ Completed the colouring

☐ Explained key vocabulary

☐ Completed the activity

☐ Used visible evidence

Evidence noticed / vocabulary used
